

Everest Mentor Flex+ VideoProbe

The latest generation built for efficiency

Mentor Flex just got an upgrade.

And you are able to trade-in your existing model to buy the new Mentor Flex+ for a new level of inspection capability.

With QuickChange probes, Mentor Flex+ delivers greater versatility to tackle a wider range of applications, while enhanced image quality improves probability of detection and reduces uncertainty. The improved articulation and Always Up with real-time orientation feedback help inspectors navigate faster, easier, and with more confidence.

How to turn your current equipment into the next generation

Contact us to get a quotation to trade-in your current XL or Mentor Flex system. You also have the option to request a subscription quote for trading in multiple systems including maintenance services with flexibility to trade in at your preferred pace. In both options you will receive the new Mentor Flex+ after sending your current system to one of our service centers and immediately take advantage of all the innovative changes.
