

EZCase drills the longest interval in offshore exploratory field

CHALLENGES

- Drill with 20-in. casing from seabed to casing point
- Maintain vertical
- Drill-out of with 17 1/2-in. PDC bit

SOLUTION

- 24-in. [EZCase™](#) (four blade, 19mm cutters) deployed on 20-in. casing
- Steel alloy body provides necessary integrity and durability to drill to TD
- Optimized cutting structure and hydraulics for greater performance and verticality
- Designed for PDC drillability

RESULTS

8 casing runs

Consecutive runs to TD with no issues

226 m drilled

Longest interval yet in the field

89 m/hr

Top quartile performance

PDC drill-out

Successful drill ahead with 17 1/2-in. PDC
