

# Reliability, accuracy & robustness in harsh environments

Druck's 4400T is the new high-performance pressure and temperature sensor, ideal for aerospace ground and flight test.

## ELECTRICAL

- Output voltage 0.2V to 4.7Vdc
- Pressure accuracy  $\pm 0.25\%$  FS BSL NLHR
- Temperature probe PT1000 to DIN EN60751 class B

## MECHANICAL

- Mounting thread M8x1
- Diameter 14.5 mm

## ENVIRONMENTAL

- Operating temperature range  $-20^{\circ}\text{C}$  to  $+185^{\circ}\text{C}$
- Compensated temperature range  $0^{\circ}\text{C}$  to  $+170^{\circ}\text{C}$

50mm length
