

Get superior performance with advanced fluids technologies

Through a strategic collaboration with CCED, Baker Hughes has successfully delivered superior fluids solutions that:

- lower operational costs by mitigating fluid losses and stuck pipe
- enhance wellbore stability in highly depleted zones
- reinforce well integrity to minimize costly remediations
- provide reservoir-friendly LCMs to improve well productivity
- reduce environmental impact and operational costs.

Contact your Baker Hughes representative to learn more about how we are redefining Drilling and Completion Fluids with cutting-edge technologies.
