

Sentinel LCT4

High accuracy ultrasonic flow meter

Peace of mind performance

The Sentinel LCT4 is a new addition to the Panametrics line of ultrasonic flow meters. Designed specifically for high accuracy measurement of crude oil, other liquid refined hydrocarbon products, and other non-hydrocarbon liquids, it delivers extremely reliable and repeatable results and meets the strict performance requirements of OIML R117-1 and API MPMS Chapter 5.8.

The LCT4 refines the high-reliability characteristics of its predecessor, the Sentinel LCT, into an aesthetically designed, compact meter body with integral cables, no extended buffers and no junction boxes. It continues to retain all of the advantages of ultrasonic flow measurement, including:

- · No drifting or required periodic calibration
- No pressure drop
- No restriction in the pipe
- No moving parts and no filters or strainers

A true multi-viscosity meter

The LCT4 uses a number of proprietary algorithms to reduce viscosity effects, making it viscosity independent. No prover run or change of settings is required when viscosity changes. The meter retains its accuracy over the whole range between minimum and maximum viscosity, using only one calibration curve.

Applications

- · Liquid custody transfer measurement
- · Allocation measurement
- · Pipeline leak detection
- Crude oil and refined products
- · Any critical liquid process

Calibration

Laboratory calibration on the LCT4 is performed to match the application, using either a single fluid or multiple fluids. Each meter is calibrated to adhere to the OIML R117-1 international standard. Other specific calibrations are available upon request.

There is no need for recalibration when replacing transducers or electronics. This has been independently tested by NMI as part of the OIML certification.

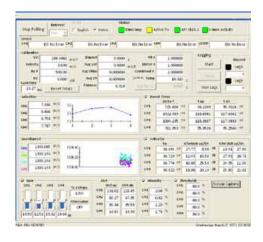

Advanced electronics

The Sentinel LCT4 electronics has digital signal processors that pack significant power in a simple package. As a standard package, several inputs and outputs are available, along with MODBUS and HART communication. The electronics is integrated with the flowcell body in a single unit, but can also be mounted remotely using an adapter and cable. Local programming and diagnostic access is done via magnetic induction to preserve hazardous area integrity. USB and RS232 connections are available to link with our Panaview software.

PanaView[™] diagnostics

The PanaView software facilitates communication between the Sentinel LCT4 and a PC. Not only does this software provide real time flow data, but it is also capable of providing historical tracking of diagnostics and a full configuration audit trail. Pictured below is a view of our diagnostic master screen.

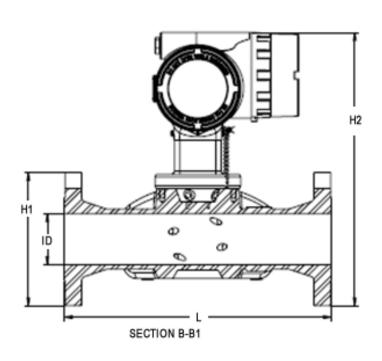

System weights

Operation and performance

Fluid types

Liquid hydrocarbons, crude and refined products, other liquids

Linearity

 \pm 0.15% of measured volume for flow rates between 1 and 33 ft/s (0.3 and 10 m/s)

Repeatability

0.02%

Uncertainty

± 0.027% according to API MPMS 5.8

Viscosity range

0 to 660 cSt

Reynolds range

> Re 10,000, consult factory for lower Reynolds numbers

Process temperature

Standard; -40 to +140°C (-40 to +248°F)

Ambient temperature

-40 to +60°C (-40 to 140°F)

Storage temperature

-40 to +85°C (-40 to +176°F)

Meter body

Meter body materials

- Carbon steel SA216 Gr. WCB (Carbon steel)
- Low temperature carbon steel SA352 Gr. LCB (Low temp carbon steel)
- Stainless steel SA351 Gr. CF8 (304SS)
- Stainless steel SA351 Gr CF8M (316SS)
- · Other materials available upon request

Pipe sizes

3 in. to 24 in.

Flange ratings

- 150 #
- 300 #
- 600 #

Pipe schedules

- \$40/40\$
- · 80/80s
- 10S
- STDXS
- · Other schedules available upon request

PED compliance

PED Cat II, module B + C1

Installation requirement = min. 10D upstream with flow conditioner; 5D downstream

Electronics

Electronics enclosure material

- · Epoxy coated aluminium
- Stainless steel A351, Gr 316/316L

Environmental protection

IP66

Power supply

- · 100 to 240 VAC
- 12 to 32 VDC

Power consumption

7 W

Display

High-contrast 128 x 64 pixel LED graphical display

Outputs

- Two isolated frequency/pulse outputs
- · Two alarm relays
- One 4/20 mA output with HART®

Inputs

- Two 4/20 mA and one 100 ohm RTD input for temperature, pressure and density input (option).
- Three 4/20 mA inputs for temperature, pressure and density input (optional)

Digital interfaces

- HART® over 4/20 mA output
- Panalink over RS232/485/USB
- Modbus RTU over RS232/485

Flow computer functionality

Integrated flow computer with full P and T volume corrections according to API 11.1

Hazardous area certifications

- USA/Canada: Class 1, Div 1, Groups B, C, & D
- Europe: ATEX II 2 G Ex d IIB+H2 (Ex de as option)
- IEC Ex: Ex d IIB+H2 (Ex de as option)

CE compliance

- 2004/108/EC EMC Directive
- 2006/95/EC LVD Directive

Custody transfer performance approvals

OIML R117-1 Accuracy Class 0.3; NMI Certificate TC7595 Multiple country-specific approvals available upon request.
