# Approval Options In Use

This section delineates the various approval ordering options currently applicable to Bently Nevada products. Each approval type specifies the product marking, with the understanding that this general information may exhibit slight variations across different products. To ascertain the availability of a particular approval type for a specific product, refer to the [Country Specific Approvals](#) section in this document.

## -00 approval option (No Approvals)

The '-00' approvals option is designated for Safe Area applications. When a product carries the label 'No Approvals,' it indicates that the product is not intended for installation in a hazardous area. Presently, the '-00' option encompasses a majority of the required markings and is generally suitable for global ordering. Noteworthy exceptions include countries necessitating additional RoHS, EMC, RF, or metrology information (e.g., China, Korea, CIS countries, etc.). Additionally, space constraints on certain products, such as Velomitors and Accelerometers, may mandate the creation of multiple approval options.

For products **without RADIO capabilities**, the -00 option is applicable in the following countries and regions:

North America	South America	Central America	European Union							
Afghanistan	Algeria	Albania	Angola	Australia 	Bahrain	Bangladesh	Belize	Benin	Bhutan	Bosnia-Herzegovina
Botswana	Brunei	Burkina Faso	Burundi	Cabo Verde	Cambodia	Cameroon	Central African Republic	Chad	Chile	China 
Comoros	Democratic Republic of the Congo	Republic of the Congo	Cote d'Ivoire	Djibouti	Dominica	East Timor	Egypt	Equatorial Guinea	Eritrea	Estonia

Trinidad and Tobago	Tunisia	Turkey	Tuvalu	United Kingdom 	Uganda	Vanuatu	Vatican City	Vietnam	Yemen	Zimbabwe
Zambia										

To determine the precise country-specific Safe Area options available, please refer to the specific product part number provided in the tables below.

In the case of Mexico, the -00 option is applicable for orders destined for a safe area, except for Power Supplies like the 3500/15. For Power Supplies, irrespective of whether they will be used in a safe area, an approval option suitable for North America hazardous areas must be chosen in accordance with NOM requirements.

For products with RADIO capabilities refer to the [Country Specific Approvals](#) section for comprehensive details on available ordering options or locate the relevant product number within this document.

## -01 approval option ('NORTH AMERICA' or 'C/US' or 'cNRTLus' Approvals)

Typically, the '-01' approvals option is designated for North America Hazardous Area applications. This Hazardous Area Approval option is suitable for selection in North America, Central America, and certain parts of South America not covered in the [Country Specific Approvals](#) section.

The list of countries and regions with -01 Hazardous Area Approvals as follows:

North America	South America (except Brazil)	Central America
---------------	----------------------------------	-----------------

## -02, -05 approval option (Multi-Approvals)

Multi-Approvals options, typically denoted as -02, or -05, combine North America and EU (ATEX) / International (IECEx) Hazardous Area markings. These hazardous area approval options are suitable for selection in North America, certain parts of Central America, South America, the European Union, and specific international countries not covered in the [Country Specific Approvals](#) section.

The list of countries and regions with -02 or -05 Hazardous Area Approvals as follows:

North America	South America (except Brazil)	Central America	European Union

Several countries require their own hazardous area certificate, have special labeling, or other unique demands. They require country-specific options to ensure they are shipped with no issues at customs. Consult the [-00 approval option \(No Approvals\)](#) section for details on ordering options or search for the product number in this document. In case of any further queries; consult the TRS Team.

## Country Specific Approvals

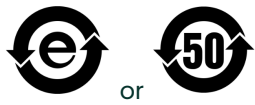

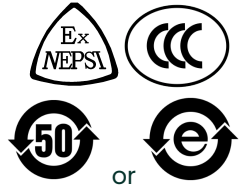

Certain countries/regions necessitate additional markings and information beyond marking provided in No Approvals, NORTH AMERICA/cNRTLus or even multi-approvals. These countries have been assigned their own dash options. If the ultimate installation of the product is intended for one of these regions or countries, selecting the corresponding country-specific approval option is imperative, superseding the options outlined above.

**For Velomitors and Accelerometers where no "-00" or Country-Specific Safe Area option is available, choose "-05" approval option as it provides necessary markings.**
