

Spotlight on Progress

Providing an employee shuttle service in Italy

Business need

Italy is home to one of our largest centers of operations globally. Approximately 6,000 of our employees commute regularly between our sites in Avenza, Massa and Florence in Tuscany.

The round-trip distance of these commutes is approximately 150 miles, an emissions impact that compounds significantly when multiplied by the large employee base.

Impact

In September 2023, we began operating a shuttle service for our employees with professional drivers to transport employees more efficiently at these locations. The shuttle operates three times per day Monday through Thursday and twice on Friday.

Since the inception, there have been 1,000+ reservations made in the first 90+ days of operation. This service furthers our emissions reduction goals by consolidating emissions produced by daily commutes and elevates employee well-being by providing an efficient and comfortable option to safely return home from work each day.

ALL IN.
CARBON OUT.

Project team

Carbon Out - IET

Strategic outcome

Reduce scope 1 and 2 greenhouse gas emissions by 50% by 2030

Supporting the UN's Sustainable Development Goals (SDGs)

In support of UN SDG target 13.2: Integrate climate change measures into policy and planning, we have implemented projects at various sites through our Carbon Out program, thereby improving our energy efficiency and reducing our emissions.
