

# ISOVOLT Titan|neo

### Robust, reliable stationary X-ray generators

The ISOVOLT Titan|neo generator powers a range of radiographic inspection technology—delivering the most reliable, consistent results in even the highest accuracy applications. So you can increase precision and inspect multiple parts each day even in 24/7 Testing Machines applications.

**Increased reproducibility:** Reduce exposure times for various materials in several operation modes with high, stable radiation and fluctuations <0.05%.

**Greater dependability:** An extended tube range and maximum current ensure enhanced imaging contrast and high penetration power.

**Unmatched flexibility:** Its modular design includes intelligent tube integration and permanent system monitoring—offering unmatched ramp-up times\* and a 100% duty cycle for continuous operation in inline systems\*\*.

#### Features

**Powerful performance** 

Permanent system monitoring

Modular design for easy integration

Convenient, user-friendly controls

#### **Built-in safety features**

\*Depending on permissible tube data. \*\*Subject to operational generator cooling.
