Sustainability
Advisory Services

SCAN NOW TO LEARN MORE

Turn lofty sustainability ambitions into real, pragmatic business actions—with a partner that makes sustainability work for your business.

Instead of figuring out where to start, you'll be reducing emissions, cutting costs, and staying ahead of regulations—with a clear, actionable path forward.

Baker Hughes Sustainability Advisory Services deliver fast, measurable results at every stage of your journey—so you don't just report progress, you prove it.

DON'T JUST KEEP UP—GET AHEAD

Sustainability goals bring pressure from regulators, investors, and customers. We help you transform that pressure into performance—turning environmental progress into a source of competitive advantage. Our advisory teams combine industry expertise, regulatory understanding, and digital tools to help you move faster, reduce risk, and achieve results that matter. It's what we've done for ourselves first.

RESULTS YOU CAN MEASURE

We build trust and readiness with high-integrity, transparent reporting. Our experts develop ISO 14064- and GHG Protocol-aligned emissions inventories across Scope 1, 2, and 3, along with ISO-based life cycle assessments to uncover hidden emissions. Optional know-how transfer programs ensure your teams gain the skills to manage future reporting with confidence and accuracy.

STRATEGIES THAT DELIVER ROI

We translate sustainability goals into achievable, cost-effective plans that align with your operational realities. From tailored decarbonization roadmaps and low-carbon technology screening to abatement strategies designed for practical execution, our approach ensures every action drives measurable business value and accelerates your path to net-zero.

RESILIENCE THAT PROTECTS YOUR FUTURE

Our climate and water specialists help you understand and mitigate risks before they impact performance. Using TCFD-aligned methodologies, we assess physical

APPLICATIONS

- Energy producers, industrials, infrastructure, and manufacturing
- Financial institutions & investors pursuing ESG alignment
- Governments and companies preparing for CSRD or SEC reporting

BENEFITS

- Accelerated decarbonization and credible data
- Reduced climate and regulatory exposure
- Improved resource efficiency and cost savings
- Clear investment decisions backed by data
- One partner from insight to execution

and transition risks across your assets and value chain, provide full water lifecycle analyses, and continuously monitor emerging regulatory frameworks—keeping your operations de-risked and future-ready.

THE TOOLS THAT TURN GOALS INTO GAINS

Service area	What you get
Emissions inventories	ISO-compliant, audit-ready carbon data
LCAs	Identify and reduce hidden emissions
Climate risk & resilience	Map vulnerabilities and strengthen disclosure
Water risk assessments	Manage exposure and efficiency
Decarbonization strategy	Actionable roadmaps to net-zero
Tech & investment screening	Prioritize scalable, high-impact solutions

MORE THAN ADVICE—EXECUTION YOU CAN COUNT ON

We deliver results, not just reports. With a global footprint and deep local expertise, our advisors understand market demands, regional regulations, and operational realities. By combining digital capabilities with industrial strength, we offer faster, smarter, technology-backed solutions trusted by leading energy, industrial, and infrastructure companies worldwide.

MAKE EVERY METRIC MATTER

Simplify compliance, meet disclosure expectations, and deliver credible, report-ready data that drives confident business decisions. Together, we turn your ESG goals into operational wins—ensuring sustainability becomes your competitive advantage.
