

Masoneilan™ and Consolidated™ ValvFAST™

Process control and pressure relief valve solutions

With Baker Hughes ValvFAST program, the valves you need will be ready when you need them.

Time is critical when it comes to replacing valves and valve components. We know that you need the right valve, on time, to reduce downtime and keep operations running smoothly.

That's why we developed the ValvFAST program. Baker Hughes certified Masoneilan Authorized Centers (MARC™) and Consolidated Green Tag™ Centers (GTC) can quickly configure valves in their facilities rather than waiting for replacement valves from the factory for a select series of Masoneilan and Consolidated valves. With the ValvFAST program, you can get the valves you need in as little as 24 hours instead of days.

**The Right
Valve,
on time**

24-Hour Service

Baker Hughes 

A Valve Program That Adds Up to Value

Faster Valve Delivery with ValvFAST

Baker Hughes ValvFAST program enables your local Masoneilan and Consolidated valve supplier to respond rapidly to your needs. Our certified MARC and GTC channel partners ensure that the Masoneilan and Consolidated valves you need will be on the shelf and waiting—so you can prepare for the unexpected before it happens. Get the valve you need in as little as 24 hours instead of weeks. Improved uptime and reduced downtime add up to bottom-line savings for your business.

ValvFAST Works On Your Schedule

With a selection of configurable, modular kits, our certified MARC and GTC channel partners can quickly configure a custom valve on site instead of waiting for the factory to deliver a new valve. This means your urgent needs can often be fulfilled in as little as 24 hours of your request.

Certified ValvFAST Channel Partners Deliver Value

- On-time delivery - custom, made-to-order valves can be ready in as little as 24 hours.
- Reduced downtime - fast delivery times help avoid costly downtime.
- Trusted quality - valves are built with OEM components and each certified facility and technicians are subject to rigorous training and annual auditing.
- The right valve - the component kit can be configured into most frequently demanded valves.

What Valves Are Available through ValvFAST?

Both Masoneilan control valves and Consolidated pressure relief valves are available in the ValvFAST program.

Masoneilan valve offerings from Baker Hughes include:

- 35002 Series Camflex II
- 31000 Series PFA lined rotary valve
- 21000 Series Reciprocating valve
- 28000 Series Varipak Microflow
- 41005 Series Reciprocating valve
- 500 Series Regulators

Consolidated valve offerings from Baker Hughes include:

- 1900/1900 Dual Media, 19000, 1982 Series Safety Relief Valves
- 2900 and 3900 Series Pilot-Operated Safety Relief Valves
- 1700, 2700, 1811, 1511, 1541/43 Series Safety Valves

High Quality Products, Just Quicker

Our certified MARC and GTC channel partners perform rigorous testing and quality control processes, including 17 separate quality checks, to ensure that the products you receive meet Baker Hughes' standards. The only difference between factory-provided valves and valves offered through the ValvFAST program is faster delivery times. You get the valves you need, when you need them—faster than before.

How To Get Started

To find your local certified MARC or GTC, and to start receiving the benefits of faster response through the ValvFAST program, contact us now by visiting our website: valves.bakerhughes.com.
