Notes:

1. Configuration for 21000 API 6A. See more details on page 27.
For high temperature application, consult Engineering.

2. Over Travel Plug only.

Temperature Range/Seat Leakage

Contoured Trim

Valve Size		Body ¹ Rating	Seat Type	Packing Material	Temperature Range ²				Cryogenic Extension		Seat Leakage IEC 60534-4 and ANSI/ FCI 70.2 Class	
Inch	mm				Standard Bonnet		Extension Bonnet		min.	max.		
					min.	max.	min.	max.

				Graphite Packing	-20°F (-29°C)	+800°F (+427°C)	-50°F (-46°C)	+800°F (+427°C)				
				V-ring					-320°F (-196°C)	+212°F (+100°C)		
			Soft Seat ⁴	Any	-20°F (-29°C)	+450°F (+232°C)	-50°F (-46°C)	+450°F (+232°C)			VI	

Lo-dB/Anti-Cavitation Trim (1 or 2 Stage Design)³

Valve Size		Body ¹ Rating	Seat Type	Packing Material	Temperature Range ²				Cryogenic Extension		Seat Leakage IEC 60534-4 and ANSI/ FCI 70.2 Class	
Inch	mm				Standard Bonnet		Extension Bonnet		min.	max.		
					min.	max.	min.	max.				
0.75 to 8	20 to 200	ASME Class 150 to 2500 and equivalent PN	Metal	PTFE, LE or LE FireSafe Packing	-20°F (-29°C)	+450°F (+232°C)	-50°F (-46°C)	+800°F (+427°C)			IV	V
				Graphite Packing	-20°F (-29°C)	+800°F (+427°C)	-50°F (-46°C)	+800°F (+427°C)				
				V-ring					-320°F (-196°C)	+212°F (+100°C)		

- ASME Class 900-1500 available only in 0.75 to 4 inch (20 to 100 mm) sizes.
ASME Class 2500 available only in 0.75 to 2 inch (20 to 50 mm) sizes.
- See Materials of Construction Tables for other temperature limitations.
- 2-Stage design only available with Quick Change seat rings.
- Soft seat is limited to a maximum of 1000 psi (70 bar) shut-off and a maximum of 450°F (232°C).

Masonellan 21000 Series products meet design and materials requirements of PED Directive 2014/68/EU.

Standard Bellows Seal construction available for ASME Class 150 - 300 (PN 20 - PN 50) and capacities of C_V = 1.7 and higher.

1. Close clearance 0.75 and 1 are available in quick change trim only (Model 21114), Class 150-600 only.

2. Models 21614 and 21615 available only in C_V ranges as indicated by green background.

1. Close clearance 0.75 and 1 are available in quick change trim (Model 21114), Class 150-600 only.
 2. Models 21614 and 21615 available only in C_V ranges as indicated by green background.
 3. Throttling at less than minimum operable C_V levels for extended period of time can result in trim damage. Also, rangeability vary from 50:1 to 12:1 (Consult Engineering).

1. 2 inch size valve with 2 inch (50.8 mm) orifice diameter is only available with quick change trim for ASME Class 150 to 600.
2. The .75 and 1 inch valves with C_v 8 is available in quick change trim only.
3. 0.75 and 1 inch valve of C_v-2 and 3 are available in ASME Class 150 through 600 only.
4. Throttling at less than minimum operable C_v levels for extended period of time can result in trim damage.

1. Double stage anti-cavitation trim not available with Bellows Seal construction.
 2. 2 inch size valve with 2 inch (50.8 mm) orifice diameter is only available with quick change trim for ASME Class 150 to 600.
 3. Throttling at less than minimum operable C_v levels for extended period of time can result in trim damage.

Materials of Construction

Standard Construction

**21000 Close Clearance
Low Flow Trim**

**Soft Seated
Plug S/A**

**LE Packing System (Optional)
Low Emission Stem Packing**

1. Materials and processes in accordance with the requirements of NACE specification MR0103. Applications requiring compliance to MR0175, 2003 Rev. or ISO 15156 would require engineering review.

2. Inconel 718 will be substituted in applications when required due to the differential pressure.

3. Materials designated for these parts conform to NACE non-exposed bolting requirements.

4. Materials designated for these parts conform to NACE exposed bolting requirements.

5. Consult Masoneilan for NACE Applications above ANSI Class 600 (PN 100) rating or above 450°F (232°C).

6. Optional component and materials for Close Clearance low flow trim option.

7. To be used with stainless steel body and bonnet.

8. Guide bushing not used with close clearance trim.

9. Solid Stellite or Equivalent is not available for Lo-dB/Anti-Cavitation plugs.

1. Materials recommended for Cryogenic Liquid Natural Gas (LNG) applications -320°F (-196°C). Consult factory for suitability in other cryogenic applications.
2. Consult factory for NACE applications.
3. Trim offerings limited to Quick Change designs only.
4. Consult factory for proper actuator sizing to provide correct valve shut-off.
5. JIS and EN material equivalents are available.

21000 BS Series Bellows Seal Design

Standard construction

Bellows seal configuration is fully compatible with the standard 21000 Series trim and actuator options providing equivalent capacity capabilities for each valve size. The standard packing box design and packing design options are used as a secondary stem seal.

Rugged design

The formed bellows construction is an externally pressurized design that is capable of operating up to the full valve ANSI B16.34 pressure rating. Guides are located above and below the bellows providing excellent stability to withstand flow induced and mechanical vibration.

Extended life

The bellows assembly is designed for 50% compression/extension (zero stress) at the valve mid-stroke position to help maximize cycle life. Bellows torsional stresses are also reduced with the anti-rotation feature provided by flats on the plug stem.

High quality

Each bellows subassembly is helium leak tested to verify weld integrity, and is also hydro-statically tested as part of the complete valve assembly. Mechanical travel stops are also designed into both the bellows and valve assemblies to prevent over compression or extension.

Smart solution

Bellows installed cycle life can be monitored in the field by utilizing Masoneilan's SVI™ Digital Positioner with actual process data. This advanced preventative maintenance option will help improve plant safety by identifying potential hazardous failures before they happen, and cut cost by reducing premature bellows replacement.

Bellows materials standard material

316/316L stainless steel

Optional materials

- Hastelloy C276
- Monel 400
- Inconel 625

Size and ratings

Pressure ratings: ASME Class 150 and 300 – PN 20 and PN 50

Valve size	Bellows design stroke		Life cycle ratings ¹		
	Inches	mm	100%	50%	25%
.75"-2"	75	19	100,000 Full Cycles	600,000 Full Cycles	3,000,000 Full Cycles
3"-4"	1.50	38.1			
6"	2.00	50.8			

1. Minimum expected average cycle life for Class 300 (PN 50) bellows operating at constant pressure.
 2. Consult Masoneilan for Bellows applications above ASME Class 300 (PN 50).

API 6A 21000 Series

High Pressure Design

API 6A 21000 Series Valve is offered from 0.75 to 1 inch, with API class 10 kPSI [690 bar] to 15 kPSI [1034 bar].

This design consists of a single ported, cage guided control valve designed to meet API 6A standards for high pressure applications:

Forged Body

Forged bodies will meet 15 kPSI (1034 bar) in operation.

Integral Bonnet

Designed with an integral bonnet, the API 6A 21000 Series Valve has a smaller profile and reduced weight.

Integral Internal Components

Seat and cage are one piece allowing for ease of installation and maintenance.

Flow Characteristic

Linear characteristic is standard.

Trim Options

Full area and reduced trims are available for optimal control.

Leakage Rate

Class IV & V leakage is standard as per IEC-60534-4.

Hardened Trim

For longer service life, hardened trim is provided to handle high pressure.

Packing

Standard packing and environmental LOW E packing options are available to comply with application requirements.

NACE Compliance

NACE MRO175/ISO 15156-1 compatible materials are available.

Size and ratings

Pressure ratings: API class from 10 kPSI [690 bar] to 15 kPSI [1034 bar]

End Connections and Shut Off

1. Pressure drop is limited at 10 kPSI [690 bar] for the 15 kPSI [1034 bar] valve.
2. API 6A 21000 valves are designed as control valves, not as isolating valves.
3. Lifting lugs are provided for handling.
