# Transform your Industrial Inspections with InspectionWorks

InspectionWorks is a nondestructive testing (NDT) software platform designed to simplify and standardize industrial inspections, without sacrificing quality. It streamlines inspection processes, standardizes reports, improves collaboration across key stakeholders, and much more.

And the best part is, it seamlessly integrates with your Waygate Devices.

Standardize your Inspections
Achieve consistent, repeatable quality of inspection with Menu Directed Inspections (MDIs), overlays, and more.

Collaborate with Key Stakeholders
Collect data at every inspection of your asset. Share inspection data securely not only with your direct team, but also between OEMs, operators, and service providers.

Digitize Your Inspection Process
Data gathered from your MVIQ+ can automatically populate InspectionsWorks. Then, generate reports with the click of a button.

Centralize your Inspection Data
Bring all your inspection data into one unified platform. View detailed inspection history and monitor defect progression to make more informed decisions.

How it Works

Start with an MDI
Create a Menu Directed Inspection (MDI) to templatize your inspection process and launch it on your MViQ+.

Capture & Analyze Data
Gather data and analyze with Real3D Measurement and AI. Automatically upload with Push2IW.

Store, Search, Measure & Share
All your inspection data is at your fingertips. Collaborate and share with key stakeholders.

Report
Automatically generate reports based on your MDI. Share reports between OEMs, service providers, and operators.
