

Measurement repeatability, every time.

PACE Tallis is Druck's new transfer standard calibrator, designed with market leading accuracy, precision and long-term stability.

With unrivalled accuracy from TERPS pressure sensing technology, PACE Tallis is an easy-to-use lab standard that is easy to set up, operate and requires minimal training for operators. Through automation, PACE Tallis removes human error from the calibration process and offers a lower product and lifetime cost than a typical DWT.

- Precision 5 ppm typical
- Long term stability 15 ppm FS/year
- Giving you confidence in your uncertainty budgets.
