

# Think calibration. Choose Druck.

Over time, test and calibration equipment can lose accuracy due to wear, contamination, environmental exposure, or accidental damage. At Druck, we bring decades of expertise in the calibration and repair of precision measurement devices – minimising downtime and maximising your confidence in your equipment.

## Why use Druck?

- Expert calibration and repair services
- Genuine Druck-approved spare parts
- Equipment rentals, health checks, and upgrades
- Six-month warranty on major repair components
- Fast turnaround to keep your operations moving
- A truly global support team
- All services are performed using original components to ensure your instruments are returned to their original specifications.

## Druck Assured Service Plans

Our flexible, scalable support plans are designed to complement Druck's industry-leading solutions – offering the peace of mind only an OEM can provide.

## Read our flyers to find out more about our different offerings:

### PACE Preventative Maintenance

Over time contamination and wear can affect the performance of your PACE Controller. To ensure the continued speed and reliability of your unit we recommend preventative maintenance is performed every 8500 hours.

### ADTS Preventative Maintenance

To ensure the continued reliability of your ADTS, we recommend preventative maintenance is performed at 1000 hours of use for your ADTS 542, and at 5000 hours of use for your ADTS 552, 553 or 554 unit.

### Druck Care plans

Choose from two care plans that ensure prioritised calibration and repair, eliminate nonessential administration, and reduce turnaround times.

# Service and support locations

Druck offers global service support to protect and prolong the life of your instrument. Whilst our headquarters are in Leicester, UK, our reach is global. Whether you need remote, off-site or on-site support, our experienced Customer Services Team is ready to respond to your technical inquiries.
